State of the Art • **Functional Safety Features**

ZEBRANO

The new standard in stability, quality and safety.

The since decades long lasting expertise from WIVAMAC® in constructing Woodturning lathes crystallizes in the latest model: the Zebrano. The Zebrano is literally a heavyweight, but still looks elegant and extraordinarily attractive. It is by far the most innovative and stable wood lathe in its price range. The Zebrano combines the classic, well-functioning and proven Wivamac solutions and quality with modern ergonomics and safety. All parts of the Zebrano have been thoroughly considered:

Zebrano, with full cast-iron frame:

- Large bed height for greater stiffness and integrated diagonal truss structure reinforcements for extra torsional stiffness
- The stand is integrated in the bed for a better stability, which is passed directly through the feet to the bed over a large width
- The stand has height adjustment with 45 mm vertical movement on each foot
- Along the bedside finished coupling surfaces are available at different heights for mounting bed extensions and bowl turning devices
- Easy installation: the feet can stand autonomously making it easy to mount the bed on it with only 2 persons

- ✓ Extremely vibration free
- ✓ Sturdy execution
- ✓ Low center of gravity because of the full cast-iron feet and low bed.

Zebrano, tailstock:

- Ergonomically enhanced asymmetrical shape
- Classical adjustable eccentric clamping system
- Park position for drive- and revolving centers
- Nonius mm/inch
- Quill 100mm
- Locking pin
- Axial thrust bearing
- Auto Eject MK2 tools
- Extreme Smooth operation

Zebrano, an ingenious tool support:

- Movable to Banjo back position. Front off-center position setting
- Curved shape for better access to hollow larger workpieces
- Classical adjustable eccentric clamping system, with adjustable lever
- Asymmetric shape for shorter work pieces and access to smaller workpiece cavities

Zebrano, headstock:

- Ergonomic design
- 280mm center height
- Eccentric and adjustable clamping system. Park position for lever
- Rotating and sliding headstock with index
- Fine zero position adjustment for precise alignment of the centers
- 5 belt positions for correct speed and torque settings
- Bearing in extreme positions
- Unique cartridge system for easy belt replacement without dismantling bearings
- Easy cassette shipment system for professional replacement, repair and overhaul of bearings
- Three different spindles / bearings for 1, 2 & 3 HP
- Variable speed setting 60-3.600tr/min
- Large transparent cover, visible belt position
- Index 24 positions
- Spindle lock
- M33 x 3.5 with protection and ejection nut and complying with the new European chuck and faceplate unwinding Security standard

- Integrated frequency inverter built-in dust proof cap
- Integrated 1 (2) additional outlet for small auxiliary machinery or lighting
- Proven asynchrone motors technology with frequency inverter and variable speed

Zebrano, for active safety:

- Coloured headstock lights indicate machine status, red warning for emergency stop door open, RPM memory function
- Security lock with special key
- Door contacts with emergency stop at opening

Zebrano, ergonomic Control Box:

- With pulse keys membrane foil and thereby dust insensitive
- Memory function, rpm and emergency stop
- Movable with strong magnet

ZEBRANO

The ultimate lathe in all sizes and with all accessories and enhancements:

	600 mm	800 mm	1000 mm
1 HP	x (*)	x	x
2 HP	x	x	x
3 HP	x	x	x

(*) also available as table-top version

Standard accessories:

- Drive center
- Revolving center
- Ejection rod
- Faceplate dia 75mm/3"

Extensions:

- Bed extensions
- Bowl turning devices

Price range: depending on model: € 4,200 - € 5,400

Delivery: from the end of February 2017

Launching Price quotation: apply via: info@wivamac.com

Reserve your machine via: info@wivamac.com

Maintenance free

10 year warranty on construction

Supplier Warranty on electronic parts.
